Alpha MK3
High Hose

HYTEK Fuel Transfer Solutions

- Made from stainless steel, making it corrosion free.
- Can be factory fitted or retrofitted to the ALPHA pump range.
- Requested by customers who have fuel tanks either side of their vehicles or require longer hoses but do not want them dragging on the ground.
- Prolongs hose life.
- Ideal to fill refrigerated lorry trailer fuel tanks.
- Helps keep the refuelling point organised.
- Choose diesel or Adblue® versions.

How does it work:

- It's connected directly to the pump outlet.
- On the end of the stainless tube a swivel is sealed onto the outlet, making the hose easier to manage during refuelling.
- Must be connected to a minimum 6.10m (20ft) delivery hose (not included).
- Makes refuelling easier especially when the tank your filling is further way.
- Outlet connection 1" BSP female.

Stk Code	Description
APL.HHOSE	ALPHA diesel pump high hose option
PH20.1	Diesel 6.10m (20ft) x 1" male/male delivery hose
