The screenshot displays the Hytek software interface. On the left is a navigation menu with options: Dashboard, Inventory data, Charts, Settings, and Contact & legal notice. The main area is titled 'Refuelings of the last three months' and contains a table with columns for Date, Value, Product, Vehicle, Mileage/operating hours, Driver, and Delivery point. The table lists 10 refueling events, including a total of 632.4 l. On the right, there is a 'Fuel tanks' section showing a 'Demo Tank (Test), Diesel' with a gauge indicating 51% full (1,272 l out of 2,500 l).

Full Cloud Software

Anytime, anywhere, any device.

We're looking to the future, & the future is the cloud.
With the GSM modem & USB download facility as standard,
you will never be without your data.

Full cloud software capabilities

- Dashboard view gives you a snapshot of your data.
- View multiple sites in one web-based system.
- With the Fill Level Probe, you can view your tank levels.
- Customise how often your data uploads to the cloud (poles), this can be as often as every hour or as little as once a day.
- Set the time you want it to upload (this can be overnight).
- Shows the last connection date in the Inventory menu.
- All graphs & reports are customisable; you can save these formats.
- All reports can be exported to .pdf or .csv format.
- Set high & low-level warnings with email alerts.
- Set up email notifications if your devices drop offline.
- Remotely set up / edit / deactivate tags & devices.
- Remotely disable the unit.
- Restrict vehicles or drivers to specific sites or fuels.
- Set limit per dispense. Add external refuellings.
- Can assign transactions to a cost centre.
- To calculate MPG, you can request an odometer reading in km or miles; if plant machinery, you can request hours (i.e. forklifts).
